Turbo Blowers

Features

- Integral molded scroll design
- Turbine bladed impeller
- Steel inlet guard
- Precisely balanced impellers eliminate vibration
- Complete line of available accessories for adapting to any piping condition or operational requirement
- More abrasion resistant than steel blower housing

Benefits

- Efficiencies of up to 50% over conventional blowers
- Meets air volume and pressure requirements with smaller horsepower
- Reduced power consumption
- Easily rotated to any of 14 available positions
- Corrosion resistant for longer life

The Hauck direct drive Turbo Blower is available in six pressure ranges from 12–36 osig (5.2–15.5 kPa) and 63 different sizes ranging from 240 to 13,000 scfm (6.4–348 m³/min) for providing large or small volumes of air at constant pressures. The Turbo Blower is designed to supply air for combustion or for any low pressure air application.
